Caltrans Completes Reinforcement of Russian River Embankment

Geyserville – Caltrans has finished improving a section of the Russian River embankment adjacent to the Geyserville Bridge on Highway 128 in Geyserville, Sonoma County.

This project was part of Caltrans' continued effort to enhance and restore the Russian River embankments in and around the Geyserville Bridge area to address erosion concerns along the west abutment of the Geyserville Bridge. Workers stabilized an approximate 90 foot section of the existing bank. Willows were installed and erosion control materials were placed in conjunction with the repair.

The work finished on August 26, and was performed in coordination with the California Department of Fish and Game; the Regional Water Quality Control Board, Region 1; the Army Corps of Engineers; the National Oceanic and Atmospheric Administration (NOAA); and elected officials at the federal, state and local levels.
